

Project contribution report

Project: NBP Analyzer

Team: [ZPI2025_IO3_BunniHopPon](#)

Aliaksandr Yurusau 253811 - Test

My main focus during the project was Quality Assurance and maintaining project standards. My core contributions included:

- **Testing & Reporting:** Executed 3 full testing cycles and produced 3 formal Application Test Reports.
- **Unit Tests:** Wrote unit tests for 2/3 application modules (Session Trends and Statistical Analysis).
- **GUI Tests:** Developed automated GUI tests using React Testing Library and Jest for all major modules (Session Trends, Statistical Analyses, and Change Distribution) to enforce strict UI constraints.
- **Bug Tracking:** Actively logged, tracked, and managed project defects using GitHub Issues and Trello.
- **Code Review:** Reviewed Pull Requests to ensure code quality and prevent regressions before merging.
- **Documentation:** Contributed to the creation and refinement of the Software Requirements Specification.
